

Excavator Grapples

Demolition, recycling and salvage operations are now easier with Kent's full line of grapples. Designed to fit carriers ranging in size from 24,000 to 100,000 pounds, these grapples are engineered with AR400 steel tines and teeth for extreme durability. A four bolt flanged hinge keeps the grapple joined for quick installation, a three position stiff arm bracket, reinforced box design and 3.5" diameter pins mean trouble-free maintenance.

Features and Benefits:

- Three versatile sizes for excavators in the 24,000 to 100,000 lb. range
- All models incorporate steel serrated tines fabricated out of AR400 (abrasion resistant) steel aligned with AR400 teeth. AR400 is 38% stronger, 46% harder and resists wear better than commonly used T-1 Steel
- Superior holding capability makes them suitable for demolition, recycling, excavation and salvage operations
- Design benefits include a 4-bolt flanged hinge that keeps the grapple joined for quick installation, a 3-position stiff arm bracket and reinforced box design mean trouble-free maintenance
- All units shipped with easy-to-follow installation instructions

SPECIFICATIONS

	MODEL		
	KEG 24X40	KEG 40X65	KEG 65X100
Carrier Range (x1,000 lbs.)	24-40	40-65	65-100
Width	36"	42"	48"
Weight (lbs.)	2958	3846	5161
Overall Opening	100"	120"	132"
Tine Thickness	2.50"	3.50"	4.00"
Tines Length	14"	16"	18"

Kent's policy is one of continual improvement. Specifications may change between printing.
